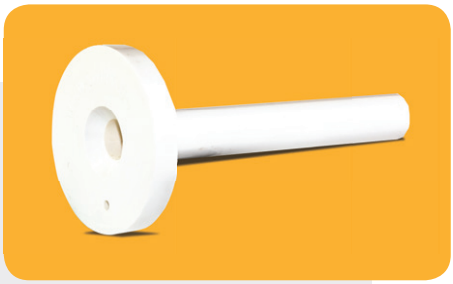
EWI Pro Approved Fixings

Innovation in External wall Insulation

SWIFIX
Protecting Your Investment

Protect your EWI System with Swifix



Engineered for use with EWI systems and tested by the BRE (British Research Establishment), Swifix products are ideal for refitting and installing items through your external wall insulation system. From satellite dishes to hanging baskets, this is the versatile fixing solution designed specifically for avoiding thermal bridging.

External wall insulation is a big investment, so it's important to make sure that your EWI Pro system is kept in good shape.

Swifix external wall insulation fixings ensure that the insulation continues to perform, enhancing the functionality of the system while keeping it safe and secure.

Versatile, durable and high-quality fixings for EWI Pro

- Swifix offers users the ability to secure fixings to EWI systems without causing thermal bridging and damage to the system.
- Items up to 100kg can be installed using the Swifix fixings
- The fixings reduce the need for mastic and silicone sealants
- They can be installed on any area of the system
- Resistant to water penetration
- Available in black or white
- Can be cut to length using a standard tube cutter, hacksaw or pipe-cutter

Retrofit Fixings: Best Practice

EWI Pro external wall insulation systems act as a thermal envelope surrounding the property; if breaks are made within the envelope, thermal bridging can occur. The current standard practice for installing fixings on EWI systems relies heavily upon the use of timber. While timber has a low thermal conductivity, it has been found to contribute towards thermal bridging and can degrade over time.

Swifix fixings help to keep the thermal envelope intact, thus maintaining the surface area of the insulation. Made of high-quality plastics, they are cost-effective, quick to install and ensure that guarantees and warranties remain secure.

Swifix products are suitable for use with the following EWI Pro insulation systems:

- EPS
- XPS
- Mineral Wool
- Phenolic

- Satellite fitting plate

- Tap fitting

- Connection point fitting

- Single fitting

- 100mm Extension Tube
